

Bringing business and IT teams together to deliver better, faster results

Transform your culture and deliver better projects with Datacom’s unique new range of Agile training courses, assessments and coaching services

Datacom’s new Agile services combine globally recognised learning frameworks with our real-world experience leading NZ’s IT industry, to create a unique and pragmatic approach that works.

Datacom’s Agile training courses, assessments and coaching services:

- Certified Agile Professional (CAP) ICAgile accredited training course
- Agile refresher workshops, customised training & upskilling courses
- Agile Health Checks: team and project maturity assessments
- On-the-job coaching & mentoring of Agile teams, Scrum Masters, Product Owners, and Managers
- Agile project kick-off facilitation

Starting Your Agile Journey

The Datacom CAP (Certified Agile Professional) training course has been designed to introduce the fundamental concepts of Agile and to teach both business and technical teams how to apply them in their daily work life. This is not “lecture-style” training; it’s hands-on and involves real-world examples and activities to enhance the learning experience.

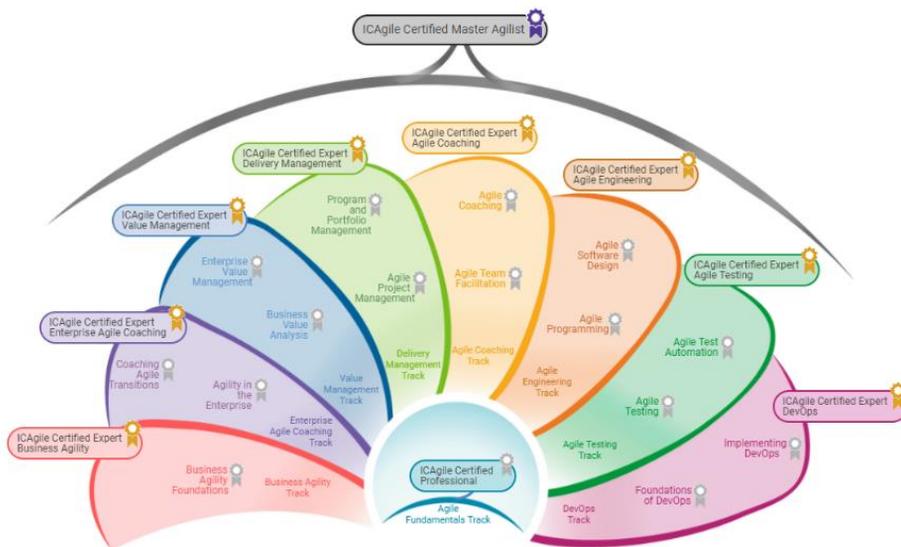

Streamlining Your Agile Teams

If your organisation is already practising Agile, but you’d like to learn how you can better streamline your development pipeline, then Datacom’s Agile Health Checks are designed specifically for this scenario. Our dedicated Agile consultants can assess team performance mid-project, and provide coaching & mentoring services to take your business and IT projects to the next level.

What is Agile?

Our world is constantly changing. The Agile development approach adapts to changes and manages uncertainties, by discovering and learning. This is achieved through iterative development, where the outcome and the solution to implement it are evolved through collaboration among self-organising, cross-functional teams.

Agile has now moved beyond software development, making impact to the business and the entire organisation.

Upon completion of Datacom’s Certified Agile Professional (CAP) course, you will be accredited by ICAgile as an ICAgile Certified Professional (ICP)

Datacom is one of Asia Pacific’s leading locally-owned IT service providers. With more than 5,700 staff across 23 offices in 16 countries, we have the breadth and experience for your IT needs.
