

Your end-to-end cloud transformation journey, from strategy to ongoing support

The cloud is a powerful and agile platform for transformation, but unlocking its full potential isn't as easy as copy + paste.

You need a tailored strategy and plan that supports your business objectives and covers your people, processes and technology.

Our Cloud Consultants start here and guide you through the whole journey, so you get maximum benefit from your cloud migration.

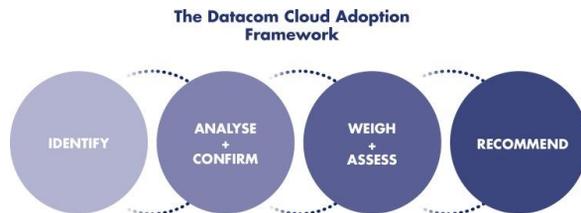

Benefits include:

- A **business mandate** for cloud adoption based on research and experience.
- **Clarity and confidence** about what needs doing and why; how and when it will be done; and what value it will deliver.
- A service provider with the skills and experience to deliver a **seamless, successful cloud adoption at any scale.**
- **Competitive advantage** from a platform designed for your business to exploit the cost, agility and scalability benefits of the cloud.
- Future cloud consumption costs that are **predictable** and deliver **clear ROI.**
- **Accountability for the full process:** from strategy to migration and ongoing support.

Ensuring you have the right workload on the right cloud.

Consult

We use our proven planning framework to develop an optimised strategy and transition plan that ensures your use of cloud delivers the business outcomes you want:

Migrate

We can then seamlessly migrate your data and commission, decommission, re-platform, remediate and consolidate your apps (or build them from scratch), as required. We also help with change management, which is key to successful cloud adoption.

Manage

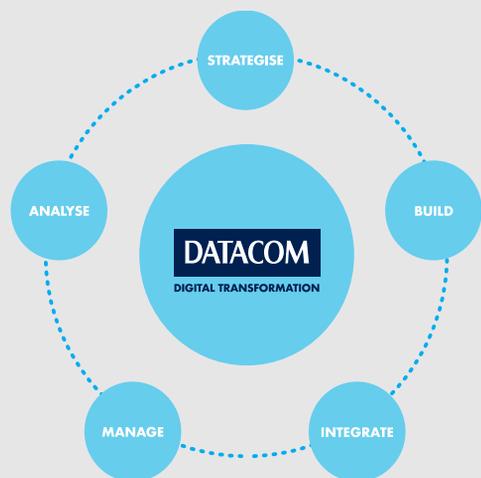

We can provide a dedicated team to deliver a fully managed, outcomes-focused service for your new cloud environment. This allows you and your team to focus on delivering more high-value strategy and services into your business. We also work with you to evolve your cloud strategy and plan as your business evolves.

Your next step

If you're unsure about where to start, or you're building a business case, then ask us for a Cloud Readiness Assessment. This initial, high-level consulting workshop is the perfect way to get started without having to invest insignificantly or commit to the full process.

The Datacom Difference

- The depth and breadth of our skills, experience and specialisations is unmatched in the Asia-Pacific region.
- We are the only truly independent partner, with specialists across all of the major public cloud providers.
- We have delivered all manner of successful private, public and hybrid cloud migrations, including helping Zespri International to go 100% public cloud.
- You can hold one partner accountable for your entire project. In addition to our Cloud Consulting team, we have the right people to cater for every aspect of digital transformation:

Datacom is one of Asia Pacific's leading locally-owned IT service providers. With more than 4,800 staff across 23 offices in 16 countries, we have the breadth and experience for your IT needs.
